

FROM THE PUBLISHER

TETFund is delivering on its mandate

The Management of TETFund under the leadership of Arc. Sonny Echono has succeeded immensely in meeting its statutory objectives through the provision of intervention lines to support physical infrastructure and project upgrade. It has also issued scholarships, and sponsored training for tens of thousands of Academic and Non-Teaching Staff, Institution-based research, entrepreneurship and many other transformative initiatives in our public tertiary education domain. In essence, the contributions of the past Board of Trustees, Management and Staff to the success of the Agency were never in doubt. In fact, the laudable feats being recorded by the current Management and Staff rest on the giant planks erected through the hard work and unwavering commitment of TETFund's past handlers. Upon resumption on March 21, 2022, Architect Echono sued for cooperation of members of staff and charged them to be more committed to smart service delivery. He also urged them to make excellence their watchword in their various endeavours. Going further, the new steersman shared some of his plans which include the continued support for National Research and Development, honing the Triple Helix Model (alliance between the academia, private sector and government) initiative, rejigged departments by enhancing their capacities for better service delivery, amongst many others. Right off the bat, and under his leading, TETFund set on a mission of expanding the frontiers of academic partnerships and cooperation with countries and institutions in the United Kingdom, Belgium, other countries in Europe, Asia and the Americas in the fields of Academic Staff and Training, Research and Development, Agriculture, and Information and Communication Technology (ICT). As a result of the visible tracks on ground so far, we have decided to bring to you in full the success story in this TETFund under the leadership of a technocrat in a cover caption; **SONNY ECHONO; THE EXPLOITS OF A REFORMER IN TETFund**
