

## FROM THE PUBLISHER

# LEADERSHIP IS ALL ABOUT IMPACT AND ACCOUNTABILITY

**T**he current administration of President Bola Ahmed Tinubu is just one year old and another three years to go. This time around Nigerians don't expect anything less than results. The citizens don't want to hear excuses which have been the hall mark of previous administrations. What the people want to see is at least evidence that the country is moving forward from the near backwardness that the last administration plunged the nation, Nigerians want to see an improvement in the electricity situation in the country but unfortunately the sector is declining from bad to worse. Nigerians want to see a visible change in the health sector different from what we had in the past where our hospitals have become mere consulting clinics. Nigerians want to see a change in our educational system that hitherto had produced unemployable graduates who litter around the town in search of elusive jobs with their half baked certificates. Nigerians are eager to witness measurable changes in all facet of the economy. This is why accountability and deliverable are key. Those who are charged to lead the various MDA's must give account of their stewardship from time to time. The citizens too must be able to gauge their performances whether or not the impact of their policy direction is being felt by the people, Nigerians are not expecting miracle overnight but at least we want to see positive actions and good moves in the right direction. This is why we commend the right step taken by the current administration to create a directorate of Policy Coordination under the leadership of an experienced technocrat Hadiza Bala Ahmed to help harmonize the different and numerous policies of government across board to ensure that the objectives of government and governance which is a social contract is felt by the people. This is the essence of our cover story for the month of June captioned. Policy Coordination is to ensure that Government delivers on its social contract with Nigerians. Hence forth we promise to bring you details of the various accomplishments in the various MDAs in this first year and the strategies they have put on ground to improve service delivery to the Nigerians in the years ahead. Keep a date and don't forget to drop a line. Nigeria is our only Country and collectively we will make our Nation great again. Leaders in all sphere of the nation must be accountable to the people who voted them to power. Remain blessed.
