

Dear Editor,

Parent warn your daughter as organs and egg harvesting are now rife in higher institutions

A very close friend of mine has a daughter of 21 who is schooling in one of the universities in the east. She came around for holiday and then fell sick last Thursday and was taken to the hospital for proper medical care. During the process of check up, her mum noticed a scar under her pelvic and she got worried, because according to her, her daughter has never had any surgery not even minor or major. So, she was wondering where the scar came from and the cause. Long story cut short. After much interrogation and the girl's refusal to speak up, she called me to come over. On getting there, I met her in real tears and I asked what the problem was and she asked her daughter to open her tummy and show me what she saw. I saw it and then asked questions and she said her daughter has refused to tell her how she got that scar. I immediately took the girl outside and interrogated her and she opened up to me that a friend of hers introduced her to a business in school last year that she did it and was paid 200k. And she said they have Doctors they meet when they are ovulating to buy their eggs. So, what they do is, they have to open them up, take the eggs and then cover them up again. As I type this, I'm still in shock. I've not recovered since Saturday. I was just able to tell her mum yesterday. I had to bring her home on Saturday night to sleep over. Then yesterday I took her back to inform her mum. My friend has not been herself till now. We don't know how to inform her dad because the whole blame will be on her as she's the one with them in Nigeria. Their dad works in Ghana. I thought to share for information sake and to be observant with our female children, because I heard it also happen in secondary school. I just hope vital organ in this girl has not been harvested. Besides do they have to open one up to collect eggs am not sure. This is indeed scary, a lot is happening out there in our Society. Any Teenager not well groomed can easily be negatively influenced. Please when we call for Teenagers Conference let's do well to bring our teenagers; a lot are perishing for lack of knowledge. Also Parents have to go the extra-mile in instilling the fear of God in our Children. For record purpose, one doesn't need to be opened up for eggs to be collected. People do IVF and are never cut open for eggs to be collected.

Dear Editor,

The many Lies in the Tinubu Independent Speech

Key highlights of the lies in that @officialABAT speech

1. Tinubu government has not attracted \$30 Billion FDI into Nigeria in the last 12 months. Recall in his last broadcast of August 2024 during the End

Hunger protests, he acknowledged \$500 Million FDI, not that I even agree with that but let me give him the benefit of doubt. When in the last one month did he get \$30 Billion FDI into Nigeria and from which countries/entities?

2. The SEPLAT ENERGY acquisition of @exxonmobil shallow water business in Nigeria was approved by Baba @MBuhari in August of 2022, except this is a new transaction

3. Tinubu claimed he has eliminated 300 Boko Haram & Bandits "commanders". This remains a lie except he can provide the list/names of these commanders. I concede that few bandit leaders have been eliminated by our gallant troops in the last few months, but 300 commanders? Hell no

4. The President also claimed he has paid back N30 trillion in "ways & means" this was one of the most childish in the retinue of lies

5. Tinubu keeps talking about clearing \$7 Billion fx backlog, but recall that in May/June 2024 @DrYemiCardoso revealed that \$2.4 Billion were identified as invalid following forensic audit by Deloitte, meaning it was \$4.6 Billion that was cleared. In any case what is the big deal about clearing fx backlog? Baba @MBuhari too cleared fx backlog without all this weird propaganda

6. Tinubu also touted the current fx rate as one of his achievements. This is actually funny coming from a man who met the fx rate at N462/\$ and has now taken it to N1,620/\$ after Aki & Pawpaw told Nigerians the true value of the Naira was around N700 & used N800 as the budget benchmark

7. Tinubu promised to use N100 Billion to deliver 3000 CNG buses for mass transit in August 2023, how many has he delivered since then? He hasn't delivered the 3,000 buses till today but he is now promising to assist 36 States & the FCT in acquiring CNG buses. Please how is this the prerogative of the President, wetin concern Tinubu with transportation in the States? Let him deliver the 3,000 CNG buses first na

8. On Agriculture, Tinubu claimed to have been sharing fertilizers for farmers, has he forgotten that the N2.15 million bags of fertilizers worth N100 Billion handed over to @SenatorAKyari by @DrYemiCardoso in March of 2024 was the same fertilizers inherited from Baba @MBuhari CBN intervention program his administration has aggressively condemned and demonized? If anyone is seeing light at the end of the tunnel it must be only Tinubu, his highly incompetent cabinet, his family, ass lickers and blind batists through the lenses of propaganda

It is shameful that @simonkolawole and his @thecableindex will attempt to gaslight Nigerians instead of fact checking the president. Shame on the Nigeria media!
